Evidence-based guidelines on adult procedural. - EBA UEMS Evidence-Based Resource in Anaesthesia and Analgesia Practice Pathway Options for Adult and Adolescent Patients Undergoing Procedural Sedation and Analgesia. These guidelines are designed to provide a standardized approach to the delivery of safe and effective procedural sedation and analgesia across different professional settings. They are intended to support practitioners in making evidence-based decisions and to promote the provision of high-quality care for patients undergoing procedural sedation and analgesia. The guidelines cover a range of topics, including patient assessment, sedation techniques, and post-procedural care. They are based on an extensive review of the available evidence and take into account the complex nature of procedural sedation and analgesia. The guidelines are regularly updated to reflect new research and clinical practice. Evidence-based guidelines on adult procedural. - EBA UEMS...
